

Left handed 16g sidelock ejector by Cogswell & Harrison – 27 1/2inch barrels with 2 1/2? barrels

Description

This Cogswell & Harrison was built, circa 1925 and is the extra quality Victor model. It's not to be confused with the Cogswell's coil-springed ejector system which was problematic – this gun is fitted with Southgate ejectors. Barrels, which have a third threaded fastener, measure 27 1/2? with 2 1/2? chambers. Engraving style on the action and barrels is acanthus scroll and floral bouquet and the gun retains about 50% of its original hardening colour. The 14 7/8 straight hand stock is cast for the left shoulder and there is a left hand grip on the strap and trigger blades. A full mechanical overhaul has been carried out, including polishing and blacking the furniture and re-chequering and blueing the safety button. All in all a well made 16 bore for a left handed shooter.

WEIGHT:		6lbs 10z					
CONDITION:		Very slight marks in right tube (would polish out)
