

28g round action by J MacNaughton – 24? x 2 3/4? barrels

Description

This delicate little 28g round action, was built circa 1885. The gun has re-proved, 24? x 2 3/4? Damascus barrels. The action and lock are sparsely engraved with the scroll. The name MacNaughton, Edinburgh is engraved across the balls of the action. This is a lever cocking version, the top lever is pierced showing the inspection port and it is little with MacNaughton's characteristic pendulum safe. The gun is totally original other than the replacement fore-end wood. The gun only weights 4 1/2lbs, it would be a pleasure to the rry all day.

WEIGHT: 4lbs 8oz

CONDITION: Some small patches of light pitting
