

12g A&D ejector by G E Lewis & Sons – 28" x 2 1/2" barrels

Description

Now, this is a beautiful, boxlock ejector by G E Lewis & Sons and is No 2 of a pair. Sleeved barrels, with a sunken game rib, measure 28" x 2 1/2" chambers, with walls of 35 and 34 thou, yet the gun only weighs 6lbs 1oz. Engraving style on the scroll-backed, bolt-action is bold acanthus, and the balls of the action have pierced strap work – in fact, it's not dissimilar to a Holland Royal. The highly figured 14 1/2" stock has panels and drop point. It includes a Silver's pad with the toe removed. A small amount of colour hardening is left on the gun and it's fitted with a full spindle lever, rocker safe and Southgate ejectors. It really is a beautiful, beautiful gun. This gun will fire standard steel cartridges without alteration.
