

12g A&D ejector by Fabarm with 30" x 3" barrels

Description

This Fabarm is about a year old and is quite an interesting gun. It has a single selective trigger and the scroll backed action has floral engraving with a stippled background. The 30" x 3" double-lumped, multi-choked barrels have a tapering bore to reduce recoil and is proved for steel. It has a beavertail fore-end and 14 3/8" pistol grip stock. Comes in its case with chokes. I'll be surprised if it's fired a slab of cartridges.

WEIGHT:		7lbs 3oz	
CONDITION:		Perfect barrel condition.
