

12g sidelock ejector by Army & Navy – 28" x 2 1/2" barrels

Description

This gun was built circa 1920, and is a back-action sidelock. New barrels, a new stock and new fore-end have been fitted to this gun and the action and locks are engraved with scroll and beaded borders. Capable of firing standard steel cartridges without alteration, this is a good old gun, at less than the cost of an AYA sidelock.
