

12g sidelock ejector by J Woodward & Sons – 29" x 2 1/2" chopperlump barrels

Description

This Woodward is in beautiful condition and is likely to have been built in the early 1890s. It is No 2 of a pair with replacement chopperlump barrels by "Purdey", proved in London with 2 1/2" chambers. Engraving style on the action and locks is Woodward's fine script and the action has chiselled arcaded fences with side clips. The locks have raised tumblers, although the gold cocking indicator is missing from the right lock. Opening system is push-forward lever which fits into a double rolled edge guard with an articulated front trigger. Retaining an original "Prince of Wales" stock and fore-end, this is a fabulous London-built sidelock ejector for less than £5,000.
